

We participate in Maine's Health Information Exchange. *Have you checked it out?*

The Health Information Exchange has patient information from more providers including:

- Encounter History
- Laboratory Results
- Radiology Reports
- Adverse Reactions/Allergies
- Immunizations
- Medication History
- Diagnosis/Conditions/Problems
- Dictated/Transcribed Documents
- and more...

Using HealthInfoNet reduces paperwork and time spent on gathering patient records.

And it can reduce mistakes and improve patient safety.

**Contact your Help Desk to set up your account.**
