

## Risk Score Summary Data

The Risk Score Summary Data is visible to users in organizations who subscribe to HealthInfoNet's Analytics and Reporting Service.

This section of the Patient Summary screen displays predictions of future emergency room visits, inpatient admissions and treatment costs.

Risk Scores Summary Data			
ED Visit	12 Month In-patient Admission	30 Day In-patient Readmission	Cost Prediction
34%	10%	35%	\$700

If your organization doesn't subscribe, users will see this message in the Risk Scores Summary banner:

Risk Score Summary Data	
	<b>Please Note</b>
Your user account is not set up to access this section.	
<a href="#">Please contact your administrator.</a> Error reference number: Portal-C7F1E86E	

This message doesn't limit access to any data or documents in the Health Information Exchange the and the account is working normally.
